Highlights in this release

New filter options under People (for finding inactive users)

In order to facilitate user management, we have added filters aimed at finding inactive users based on the below criteria. Please note that they are just as useful, or even more useful, as *Exclude* criteria.

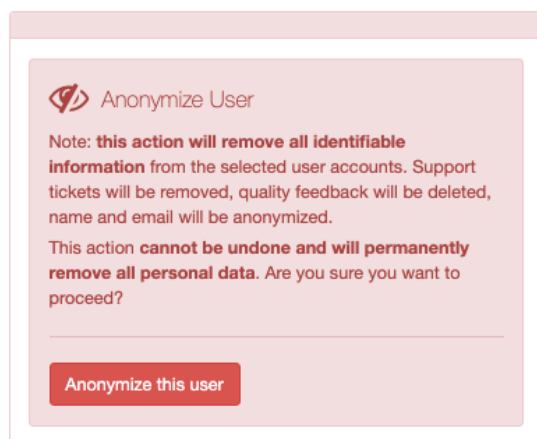

- Logged in after (date picker)
- Latest job (date picker, checking job creation – skipping Cancelled jobs)
- Latest Helpdesk ticket (date picker, checking last reply in thread)
- Latest client contact assignment (date picker, checking project creation date)

Anonymize user option

To simplify GDPR compliance, personal data can now be removed from user accounts at the click of a button. This function can be found at the bottom of the user profile page. (Please note that this option is only available for Workbench users and Manager users with the "Anonymize users" option activated.

Restricted Actions

Contains sensitive or high-impact operations. Proceed only if you understand the consequences.

Revision #3
