

Highlights in this release

As a complement to the Dashboard, the Calendar et al, there is a new option under Projects: "PM overview". This page only shows projects matching the current filter and is intended to provide an at-a-glance view of progress and jobs in need of action. It comes with built-in quick links for showing various jobs/views. Try it out.

Tip: clicking the edit icon for a job will take you to the edit form, saving will send you back to the PM overview, with the same filter settings
