

Additional security

Plint Subtitler

Visible watermark

To discourage screen capture and similar activity, a visible watermark can be superimposed on the Plint Subtitler monitor. This is activated on the Editor settings tab when editing Job properties. The watermark includes user name and IP number.

Login / authentication

Duo

Two-factor authentication using **Duo** is supported, but needs to be enabled for the site. If this is set, this requirement can be set on user level when editing People data with the Advanced form.

Login & user details

Contact informati

First & last name (required)

Example Freelancer (SE)

E-mail (required)

resource@plint.com

Status

Active

Require 2FA/MFA (required)

☐ Yes

☒ No

Azure AD

Azure AD can be implemented for SSO across the entire site. In this case, the Plint login screen will be replaced with a Microsoft login screen.
