

Report

The simplest delivery method allows a user to click a button and report the job as Done. This will change the status of the job and look for child jobs. If any are found, job owners are notified that their work can now begin. Setting the job as Done also removes it from the user's Dashboard.

Report jobs are good for offline and custom work that is a required part of a workflow but do not correspond to another delivery method.

A Report job on the user Dashboard.

A Sunny Day in Projectville

ID: 8

☐	Status	ID	Title	Part	Language	Delivery date	
☐	In process	338	Prepare and report		N/A	N/A	Report as Done
