Highlights in this release

Shark tank - Sort on most urgent job (KERNEL-752)

In order to help resources find the most urgent assignments, the [Shark tank](#) now shows the jobs with the nearest deadline at the top of the list.

Auto upload changes (KERNEL-757)

The [Auto upload delivery method](#), which fetches external files into Plint, has been rewritten to improve performance, especially when there are a multitude of waiting jobs.

Change batch quicklink export to tab separated (NETFLIX-382)

When copying multiple [quicklinks](#) from the window on the joblist page, you will now get them as a tab separated structure. This means that, for example, pasting them into Excel will result in orderly columns.

Order API improvements (KERNEL-782, KERNEL-783, KERNEL-784, KERNEL-709, KERNEL-779)

The order API now supports additional data, such as target languages and tags.

Bug fixes and minor improvements

- [Project report](#): data misplaced in wrong column when using XLSX (KERNEL-583)
 - Sometimes, the total job fee for individual currencies could end up in an incorrect column when exporting a project report as XLSX. Now fixed.
- Invoice unit not stored when placing an order with client form (KERNEL-742)
 - Client orders with an alternative invoice unit are now stored correctly
- Allowed tags lost on SRT export (KERNEL-773)
 - When exporting/auto-creating subtitles as SRT, the *sub*, *sup* and *span* tags were removed even with the option "Keep all formatting". Now fixed.
- Client order placement fails without explanation if Company (and site) does not have a default currency (KERNEL-771)
 - Under certain circumstances, client order placement would fail without explanation. Explanation now added.

Various bug fixes and minor improvements

- PTF-377, PTF-339, PTF-346, PTF-396, PTF-415, PTF-402, PTF-403, PTF-412, PTF-445, PTF-311
- KERNEL-786, KERNEL-788, KERNEL-820, KERNEL-819, KERNEL-773, KERNEL-826, KERNEL-827, KERNEL-769

Revision #10
