Fixes in this release

Attachments to Helpdesk tickets lost (PTF-441)

One of these days we're going to stop referring "that upgrade" as the cause of issues. One of these days

This one was definitely related to that upgrade, though.

Unable to save file properties in Filezone - (PTF-478)

When editing file information in the Filezone, a required File category would occasionally prevent the changes from being saved. Now fixed.

Split clip - The text direction for the new clip's editor setting is changed (NUTXTWEB-301)

If a Plint Subtitler user split a clip with the option "Split text" enabled and had the text cursor all the way to the end of the paragraph, the text direction for the newly created clip would be incorrect. This annoyance is now taken care of.

Full list of fixes

- PTF-474, PTF-476, PTF-479, PTF-480, PTF-481

Revision #4
