

# 2022-04-07

## Highlights in this release

---

### Enhancements to recalculate job fees (KERNEL-1078)

The feature that lets you [re-apply a Resource matrix again](#) (when project data has changed, for instance) is very new, but we have already improved it. Now you can also use this tool as a "calculator". The specified value will be multiplied with the number of units for the part.

### [2022-04-07-10\\_33\\_41-Example-subtitling-project-\(trailers\)--Plint.png](#)

### Finance: exporting client invoice specifications as Excel (KERNEL-1043)

As an addition to the PDF export, client invoices can now also be export in Excel format.

### Help desk: limit number of closed tickets to show (KERNEL-1075)

Listing all *closed* tickets on the "Closed" tab in the [help desk](#) section was perhaps logical, but after a while those tickets stack up. Now only the first 100 are shown, the rest can be found with the Search function.

### Include Subtitling started in Calendar filter (KERNEL-1104)

Another new feature already improved: you can now filter out jobs with Subtitling started Yes or No in the [Calendar](#) view.

### [2022-04-07-10\\_40\\_34-Calendar--Plint.png](#)

Bug fix: Not able to download attachments from tickets in the helpdesk search view (PTF-53)

Bug fix: Downloading cached versions of subtitles (NUTXTWEB-440)

Problem to import some dfxp files with the framerate 23.976fps (NUTXTWEB-437)
