

# 2022-06-07

## Highlights in this release (v22.23.1)

---

### Job Tank User Limitations (KERNEL-1009)

Simple controls for Job tank based on user Priority. For example: you can now prevent some (or all) users from grabbing jobs directly from the list, forcing them to go to the job info page first. Furthermore, you can set a limit for how many active jobs a user can have and still be able to grab more from the tank. Limits and rules are set under *Tools & Data / Job tank settings*.

### GraphQL: Control max pagination count (KERNEL-1251)

Support for site-specific limits when querying through GraphQL

### Bug fix: Font problem when rendering burnt-in subtitles

A code clean-up cleaned up too much. Functionality for using uploaded fonts with FFMPEG render now restored.
