Highlights in this release

People filter do not match skillsets (KERNEL-1831)

Bug fix or feature, perhaps both! You can now specify how to search for People on Target language, Source language and Job types. Just select "Skill sets" = Yes or No.

Additional fee as a percentage when calculating using resource matrix (KERNEL-1803)

It's finally possible to add currency-agnostic rush fees! Specify a percentage value on the "Fee" tab when editing a job. When the job fee is calculated using a Resource matrix, the fee will be adjusted (up or down) based on this value.
