Highlights in this release

Additional project filters

Joining the hallowed ranks of filter options under Projects are some new additions:

- ID higher/lower than
 - Pro tip: use these in conjunction with batch editing, to split projects into ... batchable batches
- Part name / Part ID contains
 - For the first time in Plint Core history, you can now find projects based on part information
- Description contains
- List of project IDs (comma separated)

ID higher than <input type="text" value="99"/>	ID lower than <input type="text" value="200"/>	Part name contains <input type="text" value="Trailer"/>	Part API ID contains <input type="text" value="12345"/>
Project title <input type="text" value="The Bearclaw"/>	Description contains <input type="text" value="Work in progress"/>	List of projects IDs (comma separated) <input type="text" value="List of projects IDs (comma separated)"/>

Bug fix: Joblist templates - Incorrect info about last project

Remember how the information under Tools & Data / Joblist templates used to present incorrect information about which project a template was last applied to? Well, not anymore.

#	Name	Last used	Total use	
1	Subtitling workflow (modify using project tags)	2026-01-23 (project: 492 user: 11)	136	
7	Super simple template (jobs auto-assigned)	2026-01-22 (project: 491 user: 11)	39	

Revision #1
