

Connection profiles

Under Tools & data you can configure “Connection profiles”. A connection profile is a way to incorporate external storages in your workflows. Plint currently supports FTP, SFTP and Amazon S3. Profiles can be used both in the [delivery](#) of assets and [ingest](#).

[Dashboard](#) / [Tools & data](#) / New connection profile

Type

Name (required)

Access Key ID (required)

Secret Access Key (required)

Bucket Name (required)

Root path of the connection

Region (required)

Use Accelerated Transfer
