

Plint Subtitler: setting shortcuts

([Go here for a list of available shortcuts with explanations](#))

Go to the **Settings** menu and click on **Shortcuts**:

To get more options for a shortcut, click on the item. To choose what key to use, simply mark the Keys field and press the key or combination of keys you want to use as your shortcut.

Please note that while many shortcuts can be configured to what you are used to, there are still some shortcuts that cannot be selected. This is because your browser has priority with these shortcuts.
